Membership Benefits

1. Advocacy and Liaison with National Government in support of member initiatives
* Promote value of ICTs in national government service delivery
* Assist with development of e-governance strategies and policies
* Partner in developing incubators and technology parks
* Lobbying for appropriate legislation and regulations in AU & regional parliaments
* Product and Service Endorsements on a continental level
*

2. Identification of Business Opportunities
* Encouraging intra-African business opportunity MOUs
* Share Tender databases for International bids
* Provide advisory for International tenders
* Network through global partners
* Publish African news and market intelligence

3. Conducting Research
* Annual survey of African ICT Sector
* Target reports on specific markets
* Participate in international data collection and research

4. Strengthening the African Brand
* Participation in the UN, ICANN, ITU, ICC and other ICT events throughout the year
* Strong promotion and support of member in-country events
* Run Annual ICT Champion Award®
* Run Africa ICT Personality Award®
* Generate Media Participation and Coverage of ICT issues

5. Providing membership services
* Mails on topical issues, Regular E-Newsletter, Annual Summit of members, Members Directory
* Discounts for events and publications (to get the membership fees back in the shortest time)
* ICT industry mediation and arbitration (cut down legal costs and maintains credibility of the industry by keeping matters out of court)

6. Opportunities in global Associations
* Steering Committee Membership of WITSA, WEF
* Membership of International Chamber of Commerce (ICC)
* Membership of Internet Corporation for Assigned Names and Numbers (ICANN) key constituencies (e.g Business)
* Participation in the WSIS Process

7. Events and Development Program
The Alliance organizes summits, workshops and continuous Professional development in collaboration with member national associations

ONE WORLD. ONE INTERNET.

WHAT DOES ICANN DO?

To reach another person on the Internet you have to type an address into your device – a name or a number. That address must be unique, so computers will know where to find each other. ICANN maintains and administers these unique identifiers across the world. Without ICANN's management of this system, known as the Domain Name System or DNS, we wouldn't have a global, scalable Internet where we can find each other.

Community-Driven Policy

To keep pace with dynamic technologies and rapid innovation, ICANN enables consensus-driven, multistakeholder policy development, with broad representation from the global Internet community.
Multistakeholder Model:

Civil Society & Internet Users, the Private Sector, National & International Organizations, Governments, Research, Academic and Technical Communities are all represented.

WHICH FUNCTIONS DOES ICANN COORDINATE?

- Domain Name System (DNS)
- Internet Protocol (IP) address allocation
- Protocol-Parameter Registry
- Root Server Systems

Competition & Choice

From accrediting over 1000 registrars, to introducing new Top Level Domains (TLDs), ICANN works to expand consumer choice by fostering competition and innovation in the domain name marketplace.

Security & Stability

ICANN supports DNS security through technical training and engagement, coordinating and collaborating with the community in the implementation of standards such as DNSSEC.

- Generic Top-Level Domain name (gTLD) system management
- Country Code Top-Level Domain name (ccTLD) DNS
- Time zone database management

Interoperability

ICANN's work enables new technologies to flourish while maintaining interoperability across the global Internet. For example, management of the unique protocol identifiers allows communication using secure connections between users.

Contractual Compliance

ICANN oversees the contracts it maintains and enforces the consensus policies developed through the community-driven process. ICANN's Contractual Compliance function seeks to ensure compliance with the agreements and the consensus policies.

HOW DO I PARTICIPATE?

- Sign up for updates at myicann.org
- Join one of the many Public Comment Forums on ICANN's website
- Attend ICANN's Public Meetings in person or online to provide input at a Public Forum
- Join one of ICANN's Supporting Organizations or Advisory Committees

WHO'S INVOLVED?

A number of groups, each of which represents a different interest on the Internet. All of them come together with the Board of Directors to shape ICANN decisions.

Supporting Organizations
- Addressing
- Country Code Names
- Generic Names

Advisory Committees
- At-Large
- Governmental
- Root Server System
- Security & Stability

Technical Advisory Bodies
- Technical Liaison Group
- Internet Engineering Task Force

Board of Directors

OPERATIONS · UNIQUE IDENTIFIERS · **COORDINATION** · DNS ECOSYSTEM · **CONTRACTUAL COMPLIANCE** · ICANN CONTRACTED PARTIES · Registrar Registry · **COMMUNITY-DRIVEN POLICY MAKING** · Users

National Anthem

Arise, O compatriots
Nigeria's call obey
To serve our fatherland
With love and strength and faith
The labour of our heroes past
Shall never be in vain
To serve with heart and might
One nation bound in freedom
Peace and unity.

Oh God of creation
Direct our noble cause
Guide our leaders right
Help our youth the truth to know
In love and honesty to grow
And live in just and true
Great lofty heights attain
To build a nation where peace
And justice shall reign

AfICTA

Africa Information & Communication Technologies Alliance

SUMMIT 2017

One Africa, One Future:
Leveraging ICT for Sustainable Development

Message from the Chair, AfICTA

Dr Jimson Olufuye

It gladdens my heart to see history being made in Nigeria today where for the first time a Nigerian government entity is collaborating with an African ICT private sector association to host an ICT event in Nigeria. From the perspective of AfICTA, Nigeria is the 2nd country in Africa with this engagement happening and I'd like to thank the Director-General (DG) of National Information Technology Development Agency (NITDA), Dr Isa Ali Ibrahim (Pantami) and his team for sustaining the existing Memorandum of Understanding (MoU) with AfICTA and enabling the hosting of AfICTA Summit in conjunction with NITDA's eNigeria under the auspices of the Ministry of Communications. The Minister of ICT, Barr. Adebayo Shittu and the DG of NITDA are graciously appreciated for their forward looking vision which is in tandem with the Sustainable Development Goals and the World Summit on Information Society (WSIS) target for an Information Society i.e. building partnerships with all stakeholders. We need such partnerships sustained in Africa between all stakeholders and in particular between governments and the private sector.

I'm happy that for 5 years since AfICTA was established, we have grown from a 6-nation membership to a 30-nation membership across Africa; as such I'd like to recognize our board members from Nigeria, South Africa, Egypt, Kenya, Namibia, Cote d'Ivoire and Tanzania and many other members engaging constructively. In these countries and others, we've continued to energize best practices, foster business networks and enhance intra-African trade which we aim to support governments to transform from its low point of 12% to more than 50% by 2025. Comparatively, intra-European trade is about 68%.

Trade within Africa and prosperity for our people engendered by ICTs are the fulcrum of our vision for Africa where the promise of the digital age for all

Africans is fulfilled; hence the theme of this year's Summit being "One Africa, one future: Leveraging ICTs for Sustainable Development". We are dismayed that no African country fully met the 8 goals and 21 targets for the Millennium Development Goals (MDGs) 2015 while other countries in the Middle-East and Asia even surpassed the targets notably with regard to eradication of extreme poverty and hunger, reduction in infant mortality, primary school enrollment, literacy, improvement in health service delivery etc. This is not to say that progress was not made in our countries, only that it is not fast enough. We're optimistic that with the current momentum (through Executive Orders) by the Nigerian government on ease of doing business and the use ICTs to drive governance, a cascading effect on other sectors and other countries may be realized; and our countries will surpass the Sustainable Development Goals by 2030. Therefore, I've no doubt that our distinguished experts particularly from the SDG Office will mobilize us towards the realization of the SDGs in Nigeria and in our member countries.

In 2014, East African Community (ECA) composed of Burundi, Kenya, Rwanda, Tanzania, Uganda and South Sudan announced a one network regime that eliminated roaming charges with active participation of all stakeholders, particularly the operators. With that, business received a big boost of up to 950% according to a 2016 World Bank report. We are happy to note that the West African Telecom Regulators two weeks ago followed suit to declare a framework for one network across ECOWAS with the aim to eliminate roaming charges. We are happy that many of the stakeholders are with us and will be discussing this subject further in the High level panel 1 on "Building One Future and One Network for Africa". Our hope in AfICTA is that by 2020, we should have a tariff free, one network regime for Africa.

5th AfICTA Summit
aficta.africa/summit2017

Africa Information & Communication Technologies Alliance — AfICTA

SUMMIT 2017
One Africa, One Future:
Leveraging ICT for Sustainable Development

One of our distinguished speakers today is one outstanding lady who has added tremendous value to the success of AfICTA within a short period of time and at the International level in the United Nations (UN) and at the Internet Corporation for Assigned Names and Number (ICANN). She is Marilyn Cade, former Chair of the Business Constituency (BC) of ICANN and one of the 5 global business representatives to the UN Commission for Science and Technology for Development (CSTD) Working Group on Enhanced Cooperation (WGEC) on international public policy issues pertaining to the Internet. I would like to use this opportunity to appreciate her positive role in the founding of AfICTA and in the progress we have made thus far.

Talking about the UN CSTD WGEC, I've the privilege of being one of the 5 global business representatives in the WGEC 1.0 and now 2.0. It is gratifying that the recommendation I made at the WGEC has the potential to resolve a 12-year deadlock on how to implement the 2nd track of the outcome of WSIS 2005. The 1st is the Internet Governance Forum (IGF) which is in its 12th edition. I would like to use this opportunity to urge African governments (particularly Nigeria) to support this recommendation and let this long standing deadlock be resolved with respect to how governments on equal footing can perform their role on Enhanced Cooperation on International Public Policy issues pertaining to the Internet with full participation of all stakeholders in the private sector, civil society, technical and academic communities. Some of the international public policy issues include the issue of jurisdiction - how can law enforcement officers effectively address cybercrime which is a cross-cutting and cross border issue, issues of Weapons of Math Destruction (WMD), Spam, Net-neutrality, Internet of Things, Data Protection (of note is the General Data Protection Regulation (GDPR) of EU to take effect on May 2018), Consumer Protection, Copyrights, Trademark, Cyber Conflicts, Taxation, Digital Divide, freedom of expression, women rights online, child online safety, right of people with disabilities etc.

Considering our firm belief in One Africa, One Future,

today, we are formally moving to a one Africa Internet platform represented by the African domain name .africa TLD. The .africa TLD complements our various countries ccTLD notably .ng and .za and I'd like to recognize the efforts of the African Union and the ZACR registry (manager of the string) for their effort in realizing the milestone.

AfICTA appreciates its collaboration with BC-ICANN, the ICANN Africa Stakeholder engagement Office led by Mr Pierre Dandjinou, VP ICANN and all our other sponsors - Institute of IT Professional of South Africa (IITPSA), Mainone, Galaxy Backbone, Whogohost, Association of Telecom Companies of Nigeria (ATCON) for believing in the vision and mission of AfICTA. I would like to thank the Oracle of the Nigerian ICT industry, Mr Chris Uwaje, fmr President of Information Technology (indusrty) Association of Nigeria (ITAN), Institute of Software Practitioners of Nigeria (ISPON) and co-founder of Nigeria Computer Society (NCS) in 2002 for agreeing to Chair this event. So, also to my friend and graceful CEO of Galaxy Backbone Ltd, Mr Yusuf Kazaure. I cannot conclude this speech without appreciating the Consortium that decided to champion the new model for hosting AfICTA Summits namely ADD Consortium (composed of Messrs Afenoid (Opeyemi Onifade), DigiSphere (Arinola Akinyemi) and Dotengee (Timilehin Ambali)). Thank you team for being a pioneer for Africa.

In conclusion, I would like to invite you all to attend the gala dinner tonight as we unveil the winners of the AfICTA registered brand awards: Africa ICT Personality and ICT Champion of the year 2017 awards.

Thank you NITDA and thank you our distinguished guests, members of the press, distinguished ladies and gentlemen. Thank you all for coming.

5th AfICTA Summit
aficta.africa/summit2017

Africa Information & Communication Technologies Alliance
AfICTA

SUMMIT 2017
One Africa, One Future:
Leveraging ICT for Sustainable Development

About AfICTA

Africa Information & Communication Technologies Alliance (AfICTA) is a concerned private sector led alliance of concerned ICT Associations, Multi-national Corporations, Companies, Organisations and individuals in the ICT sector in Africa.

Vision
Our vision is to fulfill the promise of the digital age for everyone in Africa.

Mission
Our mission is to encourage multi-stakeholder dialogue fostering accelerated and ICT enabled development in Africa and the use of cutting-edge innovative technologies including mobile, computing and satellite technologies to achieve an Information society in Africa.

Goals
Our goals are to
1. Organise non-government ICT stakeholders in Africa for effective local and continental advocacy.

2. Be the focal point for Africa ICT advocacy in the global digital economy.

3. Promote constant improvement in African digital literacy in collaboration with stakeholders.

4. Create partnerships with the African Union and all the regional economic commissions towards realizing global sustainable development targets for Africa.

5. Support effective dialogue between members and policy makers.

6. Mobilise the core leadership of African ICT professionals and experts in the business community, academic and technical community and civil society to be fully engaged in the global Internet Governance multi-stakeholder dialogues.

7. Promote business partnerships between members and their associations' members.

8. Contribute to capacities building by promoting best practices, encouraging regional projects, sharing data (skills, expertise, events, business announcements, exhibitions, seminars),

9. Organise an annual regional summit for knowledge sharing and cross-African advocacy.

From 6 nation members at formation on May 1st 2012, there are now membership from over 25 Countries in Africa

9

Africa Information & Communication Technologies Alliance
AfICTA

About Summit 2017

The information revolution and the extraordinary increase in the spread of knowledge have given birth to a new era - one of knowledge and information which affects directly economic, social, cultural and political activities of all regions of the world, including Africa. Governments worldwide have recognized the role that Information and Communication Technologies could play in socio-economic development. ICTs are offering even less developed countries a window of opportunities to cheetahpolevault the industrialization stage and transform their economies into high value competitive information economies in the global market

Considering that Nigeria is the leading economy in Africa; and reflecting on the need to provide veritable platform for start-ups and innovators in Nigeria to reach African market and further grow the Nigerian economy out of recession; and affirming the imperative need for enduring Public-Private Partnership for sustainable development in line with the 2030 United Nations (UN) Development Agenda; hosted by the ADD Consortium (composed of Afenoid Enterprise Limited, DigiSphere Limited and Dotengee Nig Ent.), the AfICTA Summit 2017 is scheduled to take place on 7-9 November, 2017 in Abuja, Nigeria in conjunction with eNigeria powered by the National Information Technology Develpoment Agency (NITDA) under the auspices of the Ministry of Communications Nigeria.

AfICTA Summit 2017 is the 5th in the series of AfICTA Summits beginning from Lagos in 2013 to Cairo in 2014, Johannesburg in 2015, and Windhoek in 2016.

The theme for Summit 2017 "One Africa, One Future: Leveraging ICT for Sustainable Development" is one of the key indicators of progress towards the fulfillment of AfICTA vision of a digital Africa within the larger framework of the global vision of an information society with the achievement of the Sustainable Development Goals 2030.

The Sub Themes are:

- Building partnerships for 2030 Sustainable Development Agenda
- Adaptive technologies for eHealth, eLearning and eCommerce
- eGovernment: Using technology to promote transparency and accountability
- Tackling cybercrime and securing critical information infrastructure
- Creating jobs and youth empowerment

The outcome of the conference is expected to facilitate commitment on multi-national/stakeholder synergy on Sustainable Development Goals (SDGs), become a driving force for job creations and youth empowerment. Accordingly, participation is expected from high level decision makers from the three Tiers of Government, Private Sector Organizations, Development Partners and the International Community.

AfICTA Summit 2017 Steering Committee

1. Mr Opeyemi Onifade (Afenoid) - Chairman
2. Engr Arinola Akinyemi (Digisphere) - Member
3. Mr 'Timilehin Ambali (Dotengee) - Member
4. Mr Kayode Oyeyemi - AfICTA Secretariat
